The International Journal "Food Science and Applied Biotechnology" at the Academic Publishing House of the University of Food Technologies - Plovdiv was awarded with the SCOPUS prestigious international recognition

Welcome dear colleagues and reading audience,

It is my greatest pleasure to announce that the International Journal "Food Science and Applied Biotechnology" at the Academic Publishing House of UFT - Plovdiv has received a solid recognition by the international scientific community.

On 22 February 2022 our journal was accepted for indexing by Scopus. It is the world's largest scientific database for indexing, abstracting and citing scientific journals and authors operating since 2004.

Scopus® is a registered trademark of Elsevier B.V. and covers nearly 36,377 titles from 11,678 publishers, of which 34,346 are peer-reviewed journals in top-level fields: life sciences, social, physical and other scientific areas.

This means that all publications in the Journal "Food Science and Applied Biotechnology" will now be visible in SCOPUS and can be found much more easily and cited in prestigious scientific journals by scientists around the world.

As a result of the indexing the Journal in Scopus® we expect you to increase your publishing activity. For a relatively young international scientific Journal such as "Food Science and Applied Biotechnology" which has been online free accessed for 4-5 years only this is a great success.

Our statistics shows that the Journal has been accessed by 130 countries, 47,461 people have been interested in the Abstracts and 27,461 people have read the whole manuscripts.

To date, the journal has published articles with authors’ teams from 20 countries. Apart from Bulgaria, these are scientists from Belarus, Brazil, Great Britain, Vietnam, Germany, Greece, India, Indonesia, Iraq, Iran, Italy, Kosovo, Lithuania, Nigeria, Pakistan, USA, Turkey, Ukraine and France.

Figure 1 graphically presents the trend of increasing the share of foreign authors and Figure 2 a comparison of the authors by countries has been made in the separate issues published so far.

There is a trend of a tenfold increase in the number of authors from abroad (Fig. 3).

Akterian, S. (2020). Evaluating the vapour evaporation from the surface of pure organic solvents and their mixtures. *Food Science And Applied Biotechnology, 3*(1), 77-84

We would like to inform you that the International Journal "Food Science and Applied Biotechnology" is in a process of evaluation by the other world-renowned scientific database - Web of Science and we expect to be indexed in the Emerging Source Citation Index by the end of 2022. We hope that under these new circumstances your interest in publishing with us will be quickened! We encourage and welcome you to send your valuable manuscripts to the next issue of the Journal.

Regards,
Prof. Stefan Dragoev, DSc,
Corresponding Member of Bulgarian Academy of Sciences
Editor-in-Chief of FSAB
